

DRYOPTERIS FERN

OVERVIEW

Delicately toothed fronds emerge in bright autumn colors of bronze, copper, and red and change to green as they age. Small, low maintenance fern is great for shady plantings along walkways, or in patio containers.

WATER

Requires regular water, in areas with dry season add supplemental water to keep soil consistently moist but not waterlogged. Mulch helps retain moisture.

LIGHT

Full Shade

SOIL

Prefers rich soil with high amounts of organic matter that holds moisture but does not stay soggy.
