

# LIRIOPE

## OVERVIEW

Grass like perennial that will spread out into a ground cover with brightly colored flower spikes in late summer. Popular as ground cover, especially on slopes or along walkways. Drought tolerant.

## WATER

Drought tolerant plants once established. Apply water when soils dries down until established and then back off on supplemental irrigation except under very hot and dry conditions.

## LIGHT

Full to part sun, benefits from afternoon shade in hot climates.

## SOIL

Tolerant of most soils as long as it is well drained.
