

MARJORAM

OVERVIEW

Herbaceous perennial with fragrant foliage that is popular for culinary use. Will also produce tiny flowers in the late summer and can make an attractive ground cover. Lovely addition to any herb garden or edible landscaping. Pollinator friendly.

WATER

Established plants are pretty drought tolerant, but for best foliage yield for harvesting water when the top inch or so of soil dries out. Avoid water on the foliage for highest quality harvest.

LIGHT

Full Sun

SOIL

Prefers loose, well drained soil.
